

**INTERMODAL ASSOCIATION OF NORTH AMERICA  
MAINTENANCE & REPAIR COMMITTEE**

**CHARTER - TMC INITIATIVE TASK FORCE**

**Approved May 2, 2007**

1. Explore a working relationship between the Technology & Maintenance Council (TMC) of the American Trucking Association and the IANA Maintenance & Repair Committee.

Work with TMC representatives to identify synergies between the two organizations and employ those synergies to the betterment of both organizations.

2. Within the framework of the TMC organization, identify which Study Groups are involved in items of interest to IANA.

Of the Study Groups that are deemed to be doing work that is applicable to IANA and the M & R Committee, review each TMC Task Force within those Study Groups to determine those TMC Task Force agendas that are applicable to the M & R Committee.

3. From the list of TMC Task Force committees involved in work that relates directly to the M & R Committee, determine which of the published Recommended Practices are directly applicable to the M & R Committee and make those RPs available to IANA members.
