

The Oversight Committee for the National Cooperative Freight Research Program (NCFRP)

The National Cooperative Freight Research Program (NCFRP) was authorized in the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The NCFRP is sponsored by the US Department of Transportation's Research and Innovative Technology Administration (RITA) and managed by the National Academies, acting through its Transportation Research Board (TRB), with program governance provided by an Oversight Committee including a representative cross section of freight stakeholders. A contract to begin work on the NCFRP has been executed between RITA and the National Academies and became effective on September 6, 2006.

The primary participants in the NCFRP are (a) the NCFRP Oversight Committee, appointed by the National Research Council, and composed of a representative cross section of public and private sector freight stakeholders, including shippers, carriers, US DOT, other federal agencies, state transportation departments, local governments, nonprofit entities, and academia; (b) the Transportation Research Board (TRB) as program manager and secretariat for the Oversight Committee; and (c) the US DOT's RITA as program sponsor.
