## GET TO KNOW PETERSON MANUFACTURING

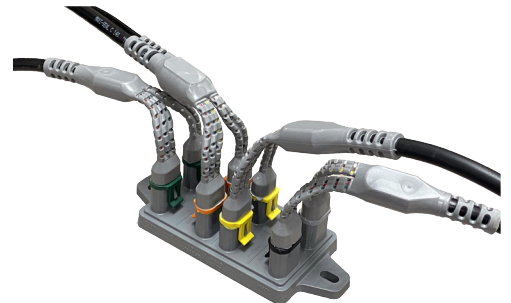

### ILLUMINATING THE PATH FORWARD SINCE 1945

Peterson Manufacturing has proudly operated as a family-owned business in the Heartland of America since 1945. From our 670,000 square-foot facility in Missouri, we design and manufacture high-quality lighting and harness solutions for all classes of vehicles and trailers both on the road and off-highway. Now in our 80th year, we've grown from a tiny manufacturer to a multi-industry, multi-national corporation. We've introduced some of the best-selling lighting and harness innovations ever designed and built customer relationships that span oceans and decades. Our ability to vertically integrate our manufacturing processes enables us to offer high-quality custom solutions for our customers' most challenging needs, no matter the application.

### RELIABILITY IN THE WORLD'S TOUGHEST ENVIRONMENTS

Intermodal chassis face some of the harshest conditions in transportation—battling congestion at ports, punishing rail yard terrain, and the wear of long-haul routes. That's why Peterson developed the PATRIOT® harness system: a corrosion-resistant, fully sealed solution built to thrive in these extreme environments. Engineered for reliability, the PATRIOT® system pairs seamlessly with our rugged LED lighting to resist weather, road debris, and constant vibration. And with built-in anti-theft features tailored for high-risk areas like ports and drop sites, it keeps your chassis lit, secure, and ready to deliver.

### LIGHTING SECURITY FOR THE LONG HAUL

At the forefront of theft deterrence, Peterson's 1-diode LED light (814R) mimics the appearance of an incandescent lamp—helping deter targeted theft at loading and delivery sites without sacrificing performance. With the addition of our robust 818-09 anti-theft bracket, Peterson is setting a new standard for lighting security in the intermodal space. When the route is tough and security is critical, Peterson delivers lighting systems that do more than just shine—they defend.

## OUR CORE VALUES

#### PRINCIPLED

We stand for quality, act with integrity, and stay accountable to our customers and values.

#### COLLABORATIVE

We achieve more by working together—with our partners, our industries, and each

#### DYNAMIC

We bring energy, creativity, and fresh thinking that drives progress.
