The Connecting Force Behind Intermodal Freight
Delivering Actionable Knowledge

- Working with leading-edge industry providers to improve technology and data-sharing solutions to enhance shipment visibility and system performance across the intermodal supply chain.
- Developing recommended practices for improving the driver's experience throughout the intermodal transportation network, to include the improvement of driver turn times at all facilities.
- Supplying top-notch education through events, relevant webinars, weekly and monthly publications highlighting issues that the intermodal supply chain cares about.
- Collaborating with industry stakeholders to improve the quality of equipment provided to draymen, and to improve on-terminal operations.
- Access to and engagement with industry experts and collaboration opportunities with all industry stakeholders through IANA's forum.

Building A Unified Community

- Working with service and product providers to enhance operational performance and optimization across the entire intermodal network, including at intermodal terminals.
- Engaging with regulatory agencies such as FMCSA, NHTSA, OSHA, FMC, USTR and Congress to ensure the intermodal voice is properly represented with them.
- Working on policy issues such as CSA, the DRIVE Safe Act, Younger Driver Pilot Program, Hours of Service and Underride Guards.
- Actively involved in the Employee Driver mandate issue, supporting efforts in California, New Jersey and other states to protect choice and to ensure an informed and unbiased view of the status of drayage truckers is represented.
- Monitoring and providing up-to-date and relevant information on government legislative, policy and regulatory issues for implications to your business.

Driving Industry Success

- Developing recommended practices for improving the driver's experience throughout the intermodal transportation network, to include the improvement of driver turn times.
- Developing solutions to improve the driver experience at intermodal terminals, and enhance equipment roadability and freight velocity through the intermodal network.
- Providing intermodal market data and offering related products that examine long term trends and make forward-looking statements.
- Delivering relevant and actionable information through our online resource center that includes data and statistics, research, recommended practices and industry tools.
