Rail Division Value Propositions

The Connecting Force Behind Intermodal Freight
Delivering Actionable Knowledge

- Working with leading-edge industry providers to improve technology and data-sharing solutions to enhance shipment visibility and system performance across the intermodal supply chain.
- Supplying top-notch education through events, relevant webinars, weekly and monthly publications highlighting issues that intermodal companies care about.
- Collaborating with industry stakeholders to improve the quality of equipment provided to draymen, and to improve on-terminal operations.
- Helping to improve the quality of equipment provided to draymen and reducing overall repairs. Recently produced educational DVIR materials, including a driver-focused video and digital and print products.
- Access to and engagement with industry experts and collaboration opportunities with all industry stakeholders through IANA’s forum.

Building A Unified Community

- Engaging with regulatory agencies such as FMCSA, NHTSA, OSHA, FMC, USTR and Congress to ensure the intermodal voice is properly represented with them.
- Monitoring and providing up-to-date and relevant information on government legislative, policy and regulatory issues for implications to your business.
- Engaging with other industry stakeholders, in conjunction with IANA’s Committee and Task Forces to work on solutions to resolve critical intermodal industry issues.
- Launched a Future Intermodal Leaders and mentoring program to assist with the development of leaders for tomorrow.
- Established a scholarship awards program with nine undergraduate schools, one professional development program and one graduate degree program to support students that are focused on freight and intermodal transportation.

Driving Industry Success

- Developing solutions to improve the driver experience at intermodal terminals, and enhance equipment roadability and freight velocity through the intermodal network.
- Developed the industry's first recommended inspection and repair practices guide for chassis mechanics to enable the industry to retain and train qualified mechanics.
- Providing intermodal market data and offering related products that examine long term trends and make forward looking statements.
- Developing recommended practices for enhancing vendor safety at intermodal terminals to supplement the Intermodal Terminal Drayman Safety Handbook.
- Working with service and product providers to enhance operational performance and optimization across the entire intermodal network, including at intermodal terminals.
